Subject: First Question Journal

Date: 2/24/83

---

Attached are the initial entries in our first question journal. The author is Simeon Leifert, the 13 year old son of Larry Leifert (Stanford VA / Robotics) and Aimee Dorr (UCLA Education). Simeon is walking around with a tape recorder and recording any question that occurs to him. He is supposed to note the context in which the questions occur. If after reading these entries, anyone has any suggestions as to how the process might be refined or amended, please speak up. At some point I think we want to ask Simeon to search for an "answer" to one of the questions he raises in existing resources and to record both the process and results. Any suggestions.
